

GXS Accounting Package Accelerators

Your EDI Integration Solution for Today's Accounting Packages

For years, small and medium-sized businesses (SMBs) have struggled to achieve the same efficiencies the Fortune 500 realize from multi-million dollar investments in sophisticated integration solutions. Until recently, only the largest companies could benefit from seamless integration of EDI documents into their back-office accounting systems.

Now, all companies—even small and medium-sized businesses (SMBs) like yours—can reap the benefits of e-commerce, eliminate manual processing of EDI documents and integrate business documents directly with your accounting system.

Does your organization struggle with:

- Complex, labor intensive processes for exchanging critical business documents with trading partners?
- High cost of data entry related to both staff time and errors that result from hand-keying data from EDI documents into your accounting system?
- Charge backs, other financial penalties and poor data quality resulting from human error in manual processes?
- Difficulty adding trading partners to your e-commerce program in a secure and timely manner?

GXS Accounting Package Accelerators (powered by eBRIDGE SOFTWARE™) provide the right solution for your business. Accounting Package Accelerators make it simple to achieve the seamless business integration enjoyed by the Fortune 500. Accounting Package Accelerators automatically pick up your incoming EDI documents and integrate them directly into your accounting package. The solution also turns your outbound documents—such as invoices—into EDI documents without re-keying.

Benefits of Accounting Package Accelerators

By supporting past and current versions of 37 accounting packages and using pre-built maps to simplify trade to today's largest enterprises, Accounting Package Accelerators allow you to leverage existing accounting software investments.

If you are a small business, you can get up and running quickly by simply downloading the solution and selecting your trading partners using an intuitive interface. If your organization is a medium-sized business, you may benefit from custom integration into high-end packages. No matter the size of your organization, you'll benefit from affordable integration through a hosted service.

GXS Accounting Package Accelerators Makes It Easy To Add Trading Partners

Accounting Package Accelerators offer your company a complete EDI integration solution, with benefits such as:

- **Improved responsiveness**—by providing fast, accurate and reliable data exchange with trading partners

SUPPORTED ACCOUNTING PACKAGES:

- ACCPAC
- Axapta
- Dynamics
- Great Plains
- Line 50
- MAS 90/200/500
- Microsoft Small Business Manager
- Navision
- PeachTree
- QuickBooks
- QuickBooks UK
- Simply Accounting
- Plus many more

FULL SUITE OF SMB SOLUTIONS

With over 40,000 SMB customers, GXS serves the needs of large and small businesses jointly and distinctly. In addition to our accounting package integration solutions, GXS offers a full suite of other solutions including intuitive web forms, electronic UPC catalog services, data synchronization solutions and machine-to-machine EDI and XML.

- **Simplified document exchange**—by providing pre-built maps that adhere to the EDI requirements of large enterprises including Fortune 500 retailers, manufacturers, pharmaceutical companies and more
- **Improved data accuracy**—by eliminating human error in the transmission of financial accounting data and providing built-in data validation rules
- **Increased business efficiency**—through timely processing and reconciliation of business documents, as well as error notices and reports to allow for accurate tracking
- **Reduced business transaction costs**—by eliminating duplicate data entry efforts and trading partner charge backs and minimizing human resource requirements
- **Maintaining current business processes**—so you can continue to use the same processes for accounting and EDI but with no need to re-enter information

Solution Features

Features of the Accounting Package Accelerators service include:

- **Pre-configured maps**—Adhere to the EDI requirements of many of today's largest enterprises; meaning that no additional programming is necessary to add most new trading partners
- **Universal integration capabilities**—Integrate EDI documents with nearly all of today's popular accounting packages, including past and current versions of 37 accounting packages from all major software publishers
- **Easy to use**—All-sized businesses, including SMBs, easily manage EDI documents and seamlessly integrate them into your existing accounting package without purchasing or learning additional software
- **Flexible**—Easy-to-use, self-service and cost effective. Companies can simply download the accounting adapter, install the solution, and test the connectivity with supplied test data
- **Scalable**—Your organization can simply add new trading partners as needed
- **Customer service**—A professional services team is available for custom integration and our Help Desk team can to assist with other technical issues
