

## Product Profile

# Edisoft<sup>®</sup> Merchant eXpress<sup>™</sup>

## Integrated Electronic Order Management Solution

### Seamless Back-Office Integration

Edisoft Merchant eXpress is a complete electronic order management and logistics system for any business utilizing electronic data interchange (EDI) and an accounting system. It has a built in order management system, the ability to generate Advanced Ship Notices (ASNs) and provides out-of-the-box integration with a number of accounting systems including QuickBooks<sup>®</sup>, Peachtree<sup>®</sup>, Simply Accounting, ACCPAC<sup>®</sup>, MYOB<sup>™</sup>, MAS90/200<sup>®</sup>, MAS500<sup>®</sup>, and Great Plains<sup>®</sup>.

Edisoft Merchant eXpress is designed to enable companies like yours to integrate your back-office systems directly with your supply chain networks. With built in Internet and value-added network (VAN) communications, e-business translation and over 1100 pre-configured trading partner kits, you are provided with a cost-effective and simple way of complying with your customer's EDI requirements.

Edisoft Merchant eXpress also incorporates the ability to easily generate automated Advanced Ship Notices (ASNs) as well as shipping labels required by large retailers.

### A Complete Solution

Edisoft Merchant eXpress offers your company a complete solution that defines seamless integration. Benefits include:

- Elimination of manual entry and re-keying of data
- Elimination of on-site programming with seamless integration to your accounting system
- Elimination of the need to import and export data for EDI
- Reduction in the complexity of EDI trading and an increase in accuracy
- Reduction in errors, cycle time and time to market

Edisoft Merchant eXpress allows you to send and receive business documents quickly, efficiently and reliably by providing:

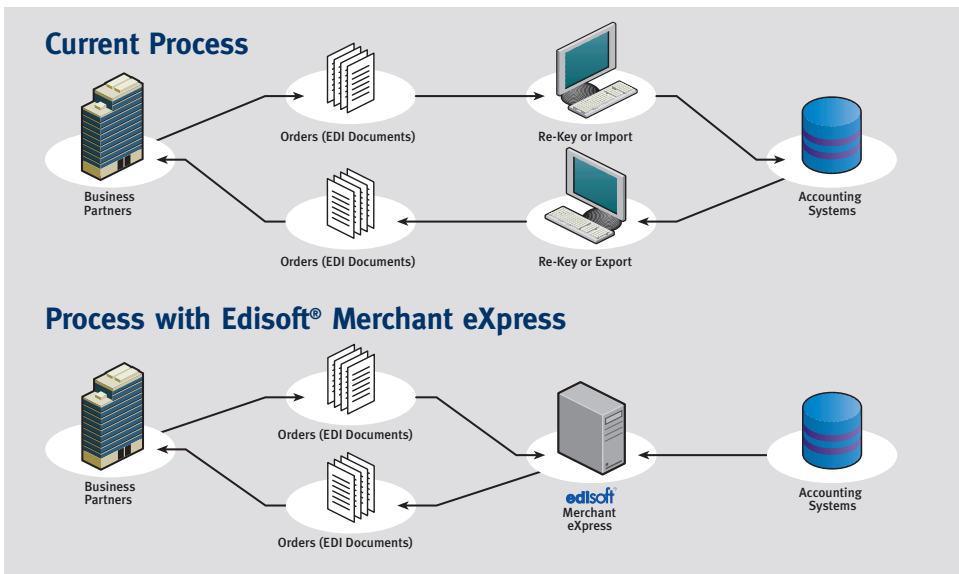

- Complete electronic order management system that augments accounting systems
- Communication, translation and integration to back-office systems
- Integration to popular accounting systems without programming
- Extensive library of hundreds of easy-to-maintain, pre-configured trading partner kits to handle all EDI trading partner needs
- Rapid template development with simple user-driven mapping functions
- Support for all major VANs, the Internet and private point-to-point connections
- Simple user-driven mapping capabilities
- Integrated add-on modules to handle logistics documents, ASNs, as well as integrated barcoded shipping labels

**Integrate your existing accounting system with a complete electronic order management and logistics system**

#### KEY BENEFITS:

- Eliminates re-keying, reducing time and errors
- Speeds program compliance with proven trading partner kits
- Reduces the complexity of EDI trading and increases accuracy
- Eliminates on-site programming and/or bridge macros

## Add-on ASN, the Barcoded Print and Remote Warehouse Modules

The ASN Module improves shipment accuracy by providing integrated automatic ASN capabilities that enable automated packing, cloning, item grouping, pooling of items on orders and support for data from external applications including handheld scanners.

The Barcoded Print Label Module integrates warehouse barcoding with the ASN to ensure data accuracy and integrity. It produces UCC128/MH10 shipping labels that can be scanned to expedite the entire shipping and receiving process.

The remote warehouse add-on module allows you to communicate with remote warehouse sites by directing the movement of merchandise out from a third party warehouse to the desired ship to location using a warehouse shipping order (940) document, which is sent from vendor/supplier and the warehousing company.

## About GXs
