Application Integrator™

Data Mapping and Translation to Empower Your E-Commerce Business Objectives

GXS' Application Integrator is a powerful, intuitive software solution that improves your productivity by offering any-to-any mapping, data translation, platform independence and rapid implementation. With a newly developed, intuitive graphical user interface (GUI), Application Integrator is an easy-to-use, flexible system that enables your company to accomplish XML, EDI and any-to-any data transformation and quickly set up trading and other business partners to participate in today's e-commerce marketplace.

The world's leading data transformation, mapping, translation and management system makes implementing your company's business-to-business (B2B) and application-to-application (A2A) programs easier and faster.

Feature	Benefits	Competitive Advantage
Drag-and-drop mapping tool	Combines ease of use and simplicity with the level of sophistication you need to define business rules unique to your business partners	Reduces the potential for introducing errors into transactions
High-performance, "one pass" data translation	Fully exploit mission critical, real-time applications where latency is an important issue	Impressive mapping and translation speed so you get the information needed right away
Fully scalable	Meet today's and tomorrow's transaction needs no matter how great the volume	No need to buy a new mapping and translation tool as your company's integration needs evolve
XML capability	Import XML DTDs and Schemas to speed and simplify your XML implementation	Quickly jumpstart your company's XML program
Numerous XML plug-ins available	Readily implement XML exchanges including xCBL, RosettaNet, EDIm1 and more	Integrate your internal systems with multiple XML dialects to stay ahead of the B2B XML explosion
Platform independence	Fully supports NT, Windows 2000 and Unix (HP, IBM, Sun, Compaq). You can implement your B2B program regardless of platform and without concern about platform changes	Works with your current IT investments no matter how you've set up your network
Complete B2B support	Standardize on a single product for all your A2A and B2B requirements because Application Integrator supports most standards: XML, RosettaNet, xCBL, EDI, ANSI, EDIFACT, TRADACOMS, EIAJ, UCS, VICS, EANCOM and others	Communicate with anyone in any IT language
Environment flexibility	Three separate environments—development, test and production—simplify compliance with your company's change control processes	Complies with your company's audit requirements and ensures error-free implementation
Fully internationalized	Available I18N plug-in extends Application Integrator's capabilities to enable B2B and A2A with over 30 fully supported double and multi-byte character sets, including UTF8 and IBM EBCDIC as well as Chinese, Japanese and Korean, among many others	Worldwide access for building a global mapping and translation system

APPLICATION INTEGRATOR FROM GXS OFFERS YOU:

- Full XML mapping and data-transformation capabilities provide a quick and easy method for extending your B2B and A2A programs
- Powerful yet user-friendly technology offers a next-generation mapping, translation and management tool with an intuitive interface utilizing "drag and drop" mapping technology
- Scalable Enterprise Application Integration (EAI) functionality provides the solution you need today while growing as your company's needs evolve
- Full standards support to meet all of your B2B and A2A needs, including XML, RosettaNet, xCBL, EDI, EIAJ and EDIFACT

The functionality of Application Integrator includes the key features that have made Application Integrator one of the most scalable and powerful mapping and translation software solutions on the market.

About GXS

GXS is a leading provider of B2B e-commerce solutions that simplify and enhance business process integration and collaboration. Organizations worldwide, including 75 percent of the Fortune 500, leverage GXS' GS1 certified global interoperability and supply chain execution solutions.
